## SOUTH CAROLINA'S GOOD RECORD LAST YEAR

More than \$78,000 was invested in thrift and war savings stamps and other government savings securities in South Carolina last year, according to a report just made by the United States Treasury Department. Much of this money represents the earnings and savings of school children, who, organized into savings clubs, of which more than 11,000 have been formed in this federal reserve district, are investing their pennies and nickels and dimes in the savings securities.

In the entire district the sales of thrift and war savings stamps and Treasury savings certificates amounted to \$1,965,897.49 with a per capita investment of 30 cents. For the country at large a total of \$41,909,700.91 is given, the per capita figure being 40 cents. Detail sales for the fifth federal reserve district are listed in the Treasury report as follows:

Maryland, \$214,889.09; District of Columbia, \$356,784.11; Virginia, \$358,727.49; West Virginia, \$502,714.76; North Carolina, \$454,245.31; South Carolina, \$78,517.73. This money represents actual savings, it is said, in addition to the funds put in bank or invested in safe commercial securities. This year the Government Savings organization of this district looks for larger sales not only because of the momentum which the savings movement is said to be gathering but because of the new \$1 and \$25 savings securities which the Treasury department is offering in addition to the savings securities sold last year and reissued in a 1921 series.
